Why Living Walls?

Living walls can give the wow factor to even the most uninspiring of spaces. But there is more to the leafy transformation than just looks – living walls can boost our wellbeing, support wildlife and improve the air we breathe.

A fast growing trend, popular among seasoned gardeners and first-time growers alike, living walls are easy to achieve and care for, and work equally well in the home as they do outdoors.

When you are able to plant almost anything, it's sometimes hard to decide where to begin!

We have carefully crafted 6 different looks – displays designed to drop jaws and redesign any space – complete with plant lists and helpful tips:

- 1 The All Green Supreme
- 2 The Vertical Allotment
- 3 The Urban Jungle
- 4 The Incredi-wall
- 5 The Wild Side
- 6 A Wall for All Seasons

You can follow each look to the leaf or adapt them to your taste. Whether you are looking for a low-maintenance display or plants that will stay green throughout the year, we have the look for you.

Happy planting!

About PlantBox

RHS CHELSEA
SUSTAINABLE
GARDEN PRODUCT
OF THE YEAR 2021
FINALIST

Revolutionising gardens and urban spaces across the UK, PlantBox is a stackable living wall that packs heaps of plants into even the smallest of spaces.

Caring for your vertical garden couldn't be easier – go weeks between watering, know when to top up and exactly how much.

Watering made easy

Each PlantBox has a water level indicator to show how thirsty plants are and holds 1.8 litres of water, preventing water-wastage and the need for daily watering. Water is poured into the top PlantBox and cascades into those below, filling up each reservoir as it goes. Plants then draw up the water they need through a special inner wicking-felt lining.

Eco-friendly and easy to assemble

A RHS Chelsea Sustainable Garden Product of the Year 2021 Finalist, PlantBox is made in Norfolk, UK from 100% recycled materials and is designed to best fit your home (indoors and outdoors). Simply click and stack together, then pack with plants of your choice!

Eco-friendly

Made in the UK from 100% recycled materials

Easy to assemble

Transforms any space

Integrated water reservoir

Overflow watering system

Tells you when to top up

1

The All Green Supreme

Simple yet stunning!

SPECIAL FEATURES:

- Year-round colour
- Low-maintenance
- Nature's chill space

GREAT FOR:

- People with limited space or no access to a garden
- First-time gardeners and seasoned professionals

This look is achieved by using lots of big, leafy evergreen plants. In addition to staying green throughout the year, the greater surface area gives an added 'fullness' to the display.

When planted vertically in groups, plants like Asplenium create interest with a unique textured effect.

The common ivy offers multiple planting options: You can let it trail over the sides of the PlantBox, keep it well pruned, or allow it to climb if planted against a wall.

Heucheras are perfect for adding that much-needed splash of colour—the options are almost endless, so pick those you like best.

1 The All Green Supreme: plant list

The plants you need to create a lush evergreen look

South facing walls

Blue fescue

Hedra helix
(the common ivy)

Slender sweet flag
'Ogon'

Heuchera
(coral bells)

Lonicera
'May Green'

North facing walls

Asplenium
(spleenworts)

Hedra helix
(the common ivy)

Bergenia
(elephant's ears)

Heuchera
(coral bells)

Dryopteris
(wood fern)

Polystichum
(shield ferns)

Top tips

For some added bee-auty

Add in plants like hebe, heather and sarcococca for year-round colour and to encourage bumblebees, butterflies and other pollinators.

2

The Vertical Allotment

You can't get more freshly picked than by your own hand!

SPECIAL FEATURES:

- Freshly picked home-grown food
- cooking herb stockist
- sustainable lifestyle
- educating children about nature
- wildlife champion

GREAT FOR:

- Those who love cooking
- people with limited space or no access to a garden
- First-time growers and seasoned professionals
- Those wanting to reduce food waste and support the environment

Growing your own food is enjoyable and satisfying, and that's before it's even hit the plate! You don't need a huge amount of space—a kitchen surface, beside the back door or an unused windowsill can all be turned into a personal fresh food aisle. This look can be easily designed around your taste buds. Choose the fruit, veggies and herbs you love the most, or why not try something completely new?

Each PlantBox trough can fit four 1 litre plants, so you can create your own customised larder, as fresh as can be!

1 The Vertical Allotment: plant list

Some inspiration for creating your vertical allotment

Top

Strawberries

Lemon balm

Middle

Curry plant

Mint

Thyme
'Silver Queen'

Thyme

Bottom

Oregano

Sage

Thyme
'Silver Queen'

Basil
(recommended for
indoor walls only)

Top tips

When growing strawberries, plant a mixture of early, mid and late crops so you can enjoy a whole summer of freshly picked fruit.

Plant for Pollinators

If you grow strawberries and tomatoes you can feed yourself the fruits while bees, butterflies and other pollinators can forage their flowers for nectar. Pollinators also love the flowers of herbs. The following thrive in PlantBox and can be used in everyday cooking: Chives, thyme, rosemary, sage, mint, oregano, lavender and borage.

3

The Urban Jungle

Step into the great indoors!

SPECIAL FEATURES:

- Health-and wellbeing-booster
- Natural air-filter
- Year-round colour
- House plant declutterer

GREAT FOR:

- Those with limited space or no access to a garden
- Home offices
- Plant lovers
- First-time gardeners and seasoned professionals

You only need a handful of houseplants to create this indoor evergreen living wall. The leaves of the prayer plant and arrowhead plant infuse colour with their respective hot pink veins and sharp variegated green. Several species of begonia provide the displays main colour, from subtle blushes to great big rosettes of bright red. These stand out best against a vibrant green backdrop, which the Boston fern and parlour palm are perfect for.

Health benefits

Plants act as round-the-clock filters to clean the air we breathe. Plants absorb high levels of nasty pollutants which they then turn into food to help them grow. Within 24 hours plants will absorb high levels of volatile organic compounds (VOCs)—airborne toxins released from everyday plastics, carpets and furnishings. Fresher air improves our health and increases our productivity.

Top tips

Swap in

The peace lily is a great addition for those looking to reduce the toxins in their home as it is able to clean the air we breathe more effectively than many air purifiers – NASA even put it on its list of Top Ten Household Air Cleaning Plants!

4

The Incredi-wall

Created by @ahouselikethis

SPECIAL FEATURES:

- Wellbeing-booster
- Cooking herb stockist
- Strong tropical vibes
- Floral scents
- Wildlife champion

GREAT FOR:

- People who want to give their wellbeing and stocks of freshly picked cooking herbs a boost.

If you want a living wall that not only looks great but also makes you feel incredible and has practical uses, then this is the living wall for you. The flowering plants will fill the space with fresh, natural scents, while encouraging bumblebees, butterflies and other pollinators. Add your favourite cooking herbs for fresh ingredients and finish off with some ornamental grasses and ferns to get that tropical vibe.

Instagram's Ky and James from @ahouselikethis explain why they created this living wall: "Spending more time at home during the first lockdown and having family outside of London in the countryside reminded us that while we love city life, we forgot how restorative being close to nature can be. We decided to create a living wall to boost our wellbeing, including plants that can scent the space, be used in cooking and, most importantly, make us feel great."

 @ahouselikethis

The Incredi-wall: plant list

The plants chosen by @ahouselikethis to create their beautiful living wall

Flowering

Alba lavender

Silverbush

Isotoma

English lavender

Coral carpet

Euphorbia
(spurge)

Hostas

Herbs

Mint

Sage

Rosemary

Thyme

Grasses

Carex
'Irish Green'

Molinia caerulea
'Moorhexe'
(purple moor-grass)

Pony tails

Pennistum
(Chinese
fountain grass)

Tufted hair grass

Ferns

Dryopteris
(wood fern)

5

The Wild Side

Take a wall on the wild side...

SPECIAL FEATURES:

- Low-maintenance
- Big volume
- Eye-catching interest

GREAT FOR:

- Balconies
- Courtyards and other urban jungles
- Low-maintenance gardening

This look is all about vibrancy and volume. Best of all it's super easy to achieve. All you need is lots of colourful heucheras, the hedge-favourite Lonicera 'May Green', and grass-like sedges such as Carex 'Ice Dance' and 'Red Rooster.' This look works especially well for medium to larger walls, but will still make an impact on a smaller scale.

Plant list

Lonicera
'May Green'

Heuchera
(Coral bells)

Varieties:
Caramel,
Palace Purple,
and Frosted Violets

Carex
'Ice Dance'

Carex
'Red Rooster'

6

A Wall for All Seasons

For literally the freshest look

SPECIAL FEATURES:

- In-season foliage
- Fresh look

GREAT FOR:

- Those who like to regularly change up their display
- First-time gardeners and seasoned professionals
- Trying something new

There's no rule saying you can't change up your display throughout the year. You can add in new plants as often as you like.

Seasonal plants work well in displays on their own or can be mixed with evergreen plants, depending on how much you would like to restyle your display.

During the spring and summer you can watch your display transform day-by-day as the plants begin to grow and flower.

Spring

Daffodils and Tulips

Summer

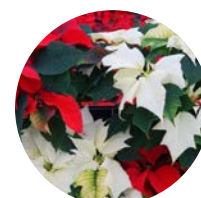

Lobelia

"It's right next to our seating area so we get to watch the bees coming and going, it's just lovely."
@finkpinkart

Autumn

Heathers

Winter

Poinsettia

Poinsettia won't tolerate cold so we only recommend them for indoor living walls!
